# Join our Family Advisory Committee!

Making a Difference Together for Children and Families

## What is the Family Advisory Committee (FAC)?

The Transforming MA Pediatrics for Early Childhood (TMPEC) project at the Massachusetts Department of Public Health is seeking family members with children ages birth through age 8 to join its Family Advisory Committee!

The TMPEC project works to ensure all children and their families in Massachusetts receive high quality, respectful care from their pediatrician's office. We believe that all children should receive pediatric care that promotes their well-being and honors their families' unique strengths, cultures, and dreams for the future.

## Why join our Family Advisory Committee (FAC)?

- **Make a Difference:** Your expertise and experiences will help shape how primary care is provided to families of young children, helping to ensure it meets their needs.
- **Empower Others:** Inspire and support fellow parents and caregivers by sharing your experiences, knowledge, and perspectives.
- **Connect and Collaborate:** Create meaningful connections with parents, caregivers, and community leaders who are committed to improving child and family well-being.

## Time Commitment

Monthly 1-hr meetings, with the opportunity to participate in other project activities as interested and available. All Family Advisory Committee members will be compensated for meeting participation and related activities.
